

SUKHBIR SEKHON

EDUCATION

UNIVERSITY OF CINCINNATI, CINCINNATI, OHIO

Anticipated Graduation Year: 2023

Bachelor's of Science Information Technology (Honors)

Masters of Business Administration (MBA)

Cumulative GPA: 3.99/4.0

WORK EXPERIENCE

GE Appliances, a Haier Company - DT Intern/Co-op

08/2020 - Present

- Assignment Title: Smart Home Solutions Intern
- Migrated old Elasticsearch's dashboards to a new ES6 cluster.
- Implemented multiple features and functionalities for appliances into the core framework and parsed several ERDs (unique IDs) for different appliances to make them available to third-party APIs.
- Created multiple AWS CloudWatch dashboards for standard network protocols (XMPP and MQTT) that are used by appliances globally.

The Cincinnati Insurance Companies - IT Intern

05/2019 - 08/2020

- Role: Software Developer
- Implemented checks and balances for multiple integral components of the company's IT systems.
- Created multiple search dashboard pages for an essential IT system to help application and system admins in troubleshooting incidents and reports from vendors.
- Created more than 40 JUnit tests using the Mockito framework to test the accuracy of the various code results.
- Migrated iText (pdf library) older version (5) to a newer version (7) library throughout the project.
- Led a team of interns to create an application that extracts email data using UIPath and inserted into another application.
- Created an AI process or system using Azure during code jam for incoming medical records to begin a claim process in the Insurance Department.

UC IT Solutions Center- Student Worker (DevOps)

09/2018 - 04/2019

- Deployed several web applications using CI/CD tool drone.io by writing multiple configuration files for different types of apps.
- Dockerized web application by building docker images and containers based on customized docker files and configuration.
- Managed multiple Linux Suse Sle 12 web servers and monitored deployment processes by acquiring system or application metrics to enhance performance.
- Built compatible ELK logging system for multiple web services to monitor the performance of microservices
- Configured servers from scratch to make it compatible for deploying web applications.

Co-op Availability: Summer 2021
